PROFESSIONAL SUMMARY

Senior Front-End Developer with 5+ years of experience building scalable, high-performance web applications using React, Next.js, and TypeScript. Delivered multi-platform SaaS dashboards, real-time aggregation systems, and multilingual landing pages across fintech, logistics, and edtech domains. Strong track record of owning full feature cycles — from architecture and component design to performance optimization and cross-functional delivery. Passionate about writing clean, maintainable code that solves real business problems.

TECHNICAL SKILLS

Front-End Core: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, React Native
Frameworks & State: TanStack Query / React Query, React Hook Form, Redux, Context API, Yup
UI & Styling: Tailwind CSS, Shadcn/ui, Bootstrap, Materialize CSS, Framer Motion
Tools & Workflow: Git, GitHub, AJAX, Axios, REST APIs, i18n, Agora.io
Back-End / Databases (Familiar): Node.js, Express.js, PHP, Laravel, MySQL, MongoDB, Firebase

PROFESSIONAL EXPERIENCE

Blend – Full-Time Senior Frontend Developer
May 2024 – Present

Built and own three production platforms for a SaaS delivery management company:

- Admin Dashboard — designed and developed the internal operations platform for global system health monitoring and configuration management, used daily by the internal ops team.
- Business Owner Portal — built a data-heavy analytics platform where restaurant and café owners manage menus, track sales metrics, and monitor multi-branch performance in real time.
- Unified Cashier System — engineered a real-time interface that aggregates orders from multiple delivery apps (e.g. Talabat, Noon Food) into a single, actionable screen — eliminating multi-device switching for cashiers.
- Developed the company's public marketing landing page, clearly communicating SaaS product value and service tiers to drive conversions.
- Stack: TypeScript, Next.js, Tailwind CSS, TanStack Query — ensuring consistent performance, maintainability, and fast iteration across all platforms.

Blue Holding – Full-Time Senior Frontend Developer
Nov 2022 – Apr 2024

- Built reusable, interactive UI components using Next.js, CSS3, and Bootstrap, enabling faster feature delivery across multiple projects.
- Managed complex component state using React hooks (useState, useEffect) and created shared Contexts to distribute React Hook Form API methods and state across component trees.
- Implemented robust form validation using React Hook Form with Yup schema builders, reducing form error rates.
- Integrated REST APIs via Axios and managed server-side state and caching with React Query, improving data fetching performance and UX responsiveness.

Fudex EBS – **Part-Time Front-End Developer** Sep 2022 – Nov 2022

- Added new features and redesigned multiple pages for stock.qvm.parts, an automotive parts inventory platform.
- Built reusable components with React.js, CSS3, and Material UI; managed state with React hooks and Redux.
- Fetched and integrated data from REST API endpoints using Axios.

NatterSearch – **Part-Time Front-End Developer** Jul 2021 – Mar 2022

- Built the front-end of a mentorship platform connecting senior engineers with mid-level and junior developers through live online sessions powered by Agora.io.
- Implemented core UI flows, including session scheduling, user discovery, and meeting room interfaces, using React.js, Context API, and React Bootstrap.
- Managed client-side state using Context API and Firebase for real-time data sync.

Sphinx Publishing Company – **Full-Time Front-End Developer** Jul 2020 – Nov 2022

- Developed interactive online educational games and stories to support digital learning for children across Kuwait, Egypt, Greece, and other countries.
- Contributed to transforming traditional classroom content into engaging, web-based interactive experiences, expanding the platform's student reach internationally.

PROJECTS

Blend SaaS Landing Page – View Live

Public marketing page for the Blend delivery management SaaS, showcasing product features, delivery app integrations, and real-time business metrics.

Tech: Next.js, TypeScript, Tailwind CSS, Framer Motion, i18n

NatterSearch – View Live

Mentorship platform connecting senior engineers with junior developers for live knowledge-sharing sessions via Agora.io video integration.

Tech: React.js, Context API, React Bootstrap, Firebase, Agora.io

React Instagram Clone – View Live

Full-stack web application replicating core Instagram features: posting, liking, commenting, and user authentication.

Tech: React.js, Materialize CSS, Node.js, Express.js, MongoDB

EDUCATION & CERTIFICATIONS

B.Sc. in Computer Science | Faculty of Science, Alexandria University

Sep 2016 – Jun 2019 | Grade: 3.13 / 4.0 (Very Good)

Certifications

- **Full-Stack Web Development with React** | Coursera | Jul 2020 – View Certificate
- **Web Design for Everybody** | Coursera | Apr 2020 – View Certificate
- **Full Stack Open Source** | Information Technology Institute (ITI) | Nov 2019 – Feb 2020 – View Certificate
- **Mobile Development (Cross-Platform)** | Information Technology Institute (ITI) | Aug 2019 – Sep 2019 – View Certificate
